

Vacuum Assist Package Station

Hydronix Model 285

Ask your Hydronix distributor or PumpTech salesperson about the model 283 AND 285 vacuum assisted priming pump station using high efficiency, low NPSH solids handling pumps. Models are available in duplex or triplex in pump sizes 3" thru 8". We offer many options available including insulated lids and heaters for cold weather and dehumidifiers for other climes. Gull-wing doors offer easy access to the interior and is sheltered from the elements.

Our vacuum priming chambers are transparent and utilize a level float to sense when the pumps are fully primed.

Many optional controls, all inside the station, are available.

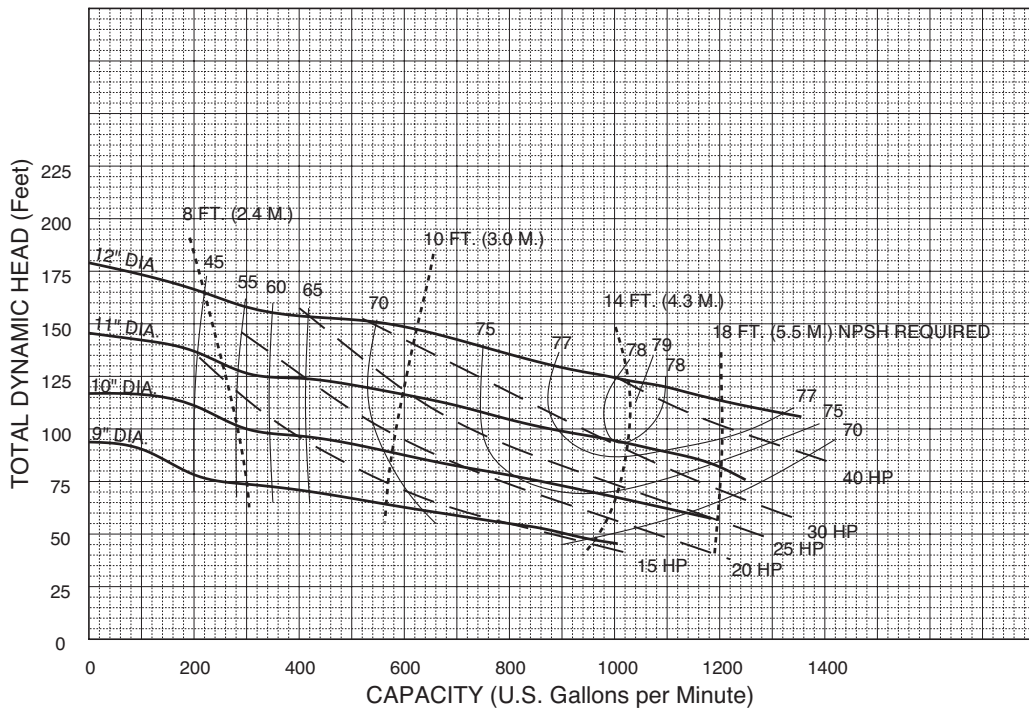

Features:

- Low maintenance, dependable performance
- No confined space issues
- No seal water concerns
- Small footprint
- Efficiency without sacrificing performance

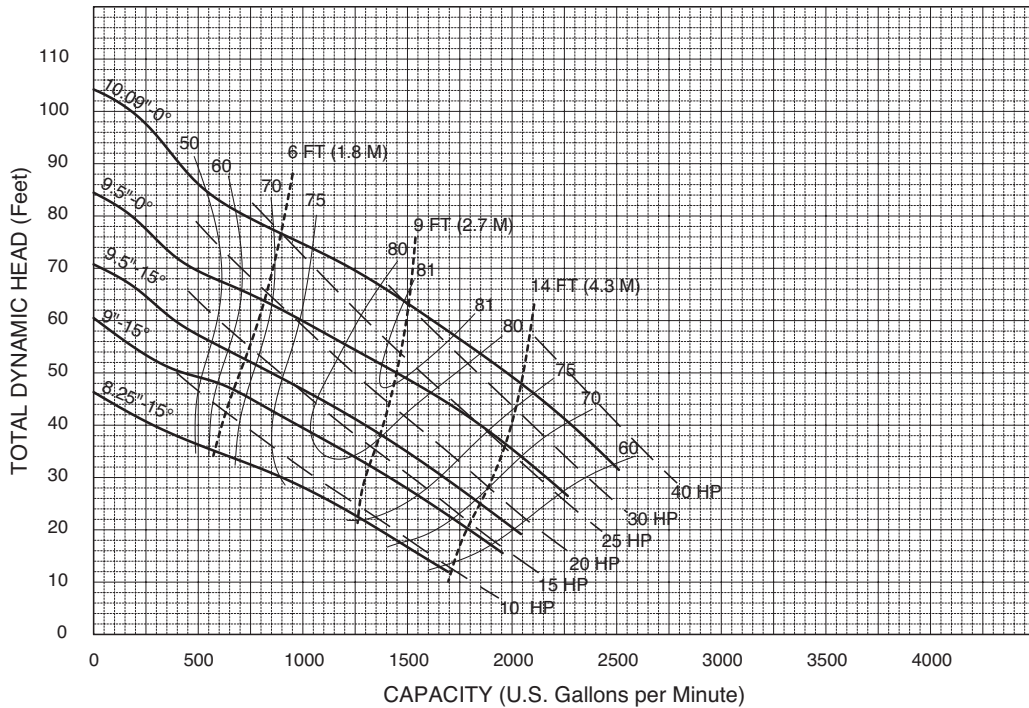

Example Models Numbers:

Model 283-73L x78W x50H

Model 285-84L x97W x63H
